\* These vehicles use the 12 pin DLC cable, 02003090.

1. Please connect directly to the SDM for EV1 electric cars.
2. Does not record pre-crash data.
3. 1999 Saturn vehicle's DLC port has a non-standard wiring configuration and does not interface with the Vetronix OBD II interface cable (02002837). Please connect directly to the SDM, or contact Vetronix for more information.
4. These trucks have different SDMs depending upon body style. If the eighth digit of the VIN is either F, J, or R, please use the **02002888** cable.
5. If no cable part number is shown, this means the vehicle is supported via DLC only.
6. Clicking on cable part number displays expected data.
7. No key is required to download these vehicles, leave ignition off.
8. If production sequence number (last 6 digits of the VIN) is 500000 or lower.
9. If production sequence number (last 6 digits of the VIN) is 500001 or higher.
10. If engine code is 9 or E (8th digit of VIN).
11. If engine code is **not** 9 or E (8th digit of VIN).
